

Location:	Milford Haven
Project Value:	£750,000
Project Start Date:	January 2008
Project Completion:	January 2008

Project Information

Caswell Group were involved in the identification, delineation, removal and disposal of over 3000 tonnes of contaminated soils at CB&I's Liquid Natural Gas Terminal at Milford Haven.

The project involved close liaison with the Client, Client's Representative and Regulators to ensure that on site remediation works were completed within a timescale of 2 weeks on this high profile site.

The works were completed to the Client's satisfaction within programme and budget and allowed unrestricted development at the site.
